

Diagrams 2008: 5th International Conference on the Theory and Application of Diagrams

Herrsching, Germany
September 19 – 21, 2008

Diagrams is an international and interdisciplinary conference series, covering all aspects of research on the theory and application of diagrams.

Recent technological advances have enabled the large-scale adoption of diagrams in a diverse range of areas. Increasingly sophisticated visual representations are emerging and, to enable effective communication, insight is required into how diagrams are used and when they are appropriate for use. The pervasive, everyday use of diagrams for communicating information and ideas serves to illustrate the importance of providing a sound understanding of the role that diagrams can, and do, play. Research in the field of diagrams aims to improve our understanding of the role of diagrams, sketches and other visualisations in communication, computation, cognition, creative thought, and problem solving. These concerns have triggered a surge of interest in the study of diagrams.

The study of diagrammatic communication as a whole must be pursued as an interdisciplinary endeavour. *Diagrams 2008* is the fifth event in this conference series, which was launched in Edinburgh during September 2000. *Diagrams* attracts a large number of researchers from virtually all related fields, placing the conference as a major international event in the area.

Diagrams is the only conference that provides a united forum for all areas that are concerned with the study of diagrams: for example, architecture, artificial intelligence, cartography, cognitive science, computer science, education, graphic design, history of science, human-computer interaction, linguistics, logic, mathematics, philosophy, psychology, and software modelling.

For the first time in its history, *Diagrams* will be co-located, running in conjunction with the *IEEE Symposium on Visual Languages and Human-Centric Computing* and the *ACM Symposium on Software Visualization* as part of *Visual Week*. This co-location will provide a lively and stimulating environment, enabling researchers from related communities to exchange ideas and more widely disseminate research results. Cross-conference participation is encouraged and the program will include joint keynote speakers.

Diagrams 2008 will consist of sessions including presentations of refereed papers, posters and tutorial sessions. We invite submissions of

- long research papers (15 pages)
- short research papers (7 pages)
- posters (3 pages)
- tutorial proposals (1 page; see the conference web page for full details)

that focus on any aspect of diagrams research. Long papers should present original research results. Short papers and posters should present original research contributions, position or problem statements, summarise software to support the use of diagrams, or integrate results published elsewhere which are of interest to the *Diagrams* community.

All submissions will be fully peer reviewed. The proceedings will be published by Springer in their Lecture Notes in Computer Science series, www.springer.com/lncs.

Full details on the preparation of submissions can be found on the conference web site www.cmis.brighton.ac.uk/diagrams2008.

Topics of interest include, but are not limited to:

- applications of diagrams
- computational models of reasoning with, and interpretation of, diagrams
- design of diagrammatic notations
- diagram understanding by humans or machines
- diagram aesthetics and layout
- educational uses of diagrams
- graphical communication
- heterogeneous notations involving diagrams
- history of diagrammatic notations
- information visualization using diagrams
- novel uses of diagrams
- psychological issues pertaining to perception, comprehension or production of diagrams
- reasoning with diagrams
- software to support the use of diagrams
- theoretical aspects of diagrams including, for example, classification and formalization
- usability issues concerning diagrams

Important Dates

Abstract submission	20 th March 2008
Paper and tutorial submission	1st April 2008
Poster submission	11 th April 2008
Notification for papers/tutorials	16 th May 2008
Notification for posters	23 rd May 2008
Camera ready copies due	13 th June 2008
Visual Week	15 th – 21 st September 2008
Diagrams conference	19 th – 21 st September 2008

Organisation

General Chair	Gem Stapleton, University of Brighton, UK
Program Chairs	John Howse, University of Brighton, UK John Lee, University of Edinburgh, UK
Local Chair	Mark Minas, Universität der Bundeswehr, Germany
Publicity Chair	Andrew Fish, University of Brighton, UK

Program Committee

Gerard Allwein (Naval Research Laboratory, USA)	Stefano Levaldi (University of Rome - "La Sapienza", Italy)
Michael Anderson (University of Hartford, USA)	Richard Lowe (Curtin University of Technology, Australia)
Dave Barker-Plummer (Stanford University, USA)	Grant Malcolm (University of Liverpool)
Alan Blackwell (Cambridge University, UK)	Kim Marriott (Monash University, Australia)
Dorothea Blostein (Queen's University, Canada)	Bernd Meyer (Monash University, Australia)
B. Chandrasekaran (Ohio State University, USA)	Nathaniel Miller (University of Northern Colorado, USA)
Peter Cheng (University of Sussex, UK)	N. Hari Narayanan (Auburn University, USA)
Phil Cox (Dalhousie University, Canada)	James Noble (Victoria University of Wellington, NZ)
Richard Cox (University of Sussex, UK)	Jesse Norman (University College London, UK)
Frithjof Dau (University of Wollongong, Australia)	Jon Oberlander (University of Edinburgh)
Max J. Egenhofer (University of Maine, USA)	Luis Pineda (Universidad Nacional Autónoma de México, Mexico City)
Stephanie Elzer (Millersville University, USA)	Helen Purchase (Glasgow University, UK)
Yuri Engelhardt (University of Amsterdam)	Thomas Rist (Fachhochschule Augsburg)
Jacques Fleuriot (University of Edinburgh, UK)	Peter Rodgers (University of Kent, UK)
Jean Flower (Autodesk, UK)	Frank Ruskey (University of Victoria, Canada)
David Gooding (Bath University)	Atsushi Shimojima (Doshisha University, Japan)
Corin Gurr (University of Reading, UK)	Sun-Joo Shin (Yale University, USA)
Mary Hegarty (University of California, Santa Barbara, USA)	John Sowa (VivoMind Intelligence Inc.)
Mateja Jamnik (Cambridge University, UK)	Keith Stenning (University of Edinburgh, UK)
Yasuhiro Katagiri (Future University, Japan)	Nik Swoboda (Universidad Politécnica de Madrid, Spain)
Hans Kestler (University of Ulm, Germany)	Gabi Taentzer (Technical University of Berlin)
Zenon Kulpa (Institute of Fundamental Technological Research, Poland)	Susan Trickett (Naval Research Laboratory, USA)
Oliver Lemon (University of Edinburgh, UK)	Barbara Tversky (Stanford University, USA)
